make some
serious money
by going green

Make a positive impact by recycling your redundant IT material and...

MAKE SOME SERIOUS MONEY !

By letting us take care of your redundant IT equipment we can zero out your disposal and storage costs as we remove, data wipe and resell, donate or recycle all your IT equipment for FREE, and on top, also pay you serious money for the acquired IT assets !

GO GREEN !

By selling your equipment to us, you can rest assured that you are fulfilling your environmental obligation. We have a 0% landfill policy and all of the equipment we receive is handled in an environmentally friendly manner. Anything that cannot be reused is recycled or disposed of following the most strict WEEE directives.

MAKE A DIFFERENCE TO THE WORLD !

If you opt for donating your IT material to GreenPC, we will use it to support our third and fourth-world charity projects. We track all equipment that we receive, allowing you to see how you directly contributed to improvement of lives in communities around the world.

ENHANCE YOUR IMAGE !

In a environment where ethical concerns are growing amongst customers, choosing GreenPC will highly enhance the PR image of your company.

GreenPC will:

- ✓ pay serious money for your redundant IT equipment!
- ✓ pick up your IT material for free.
- ✓ wipe all data safely, certified, guaranteed and for free.
- ✓ create a detailed inventory and tracking report for free.

how it works

3

1

PICKUP AND INITIAL INVENTORY

After our initial quotation and your acceptance of it, we will operate the following way:

- ✓ we'll send over the GreenPC team, 2 to 5 motivated and experienced people, who will collect your PC's and other IT equipment from your users desks.
- ✓ The GreenPC team will tag every PC, peripheral and cable with a barcode ID.
- ✓ Every unit is entered in our database with its unique ID, and its features and eventual visible flaws are described.
- ✓ If required, we can remove the hard disks and store them in a secured safe.
- ✓ All units are packed, sealed and stored on euro-pallets of 50 to 100 units, and pictures are taken of every individual pallet.
- ✓ The pallets are then temporary stored in a storage space within your building.
- ✓ After signing off, a truck will pick them up, and ship them to our processing factory. GreenPC is optimising transport to keep our carbon footprint as low as possible.

2

CLEANUP AND FINAL INVENTORY

Once your equipment arrives in our factory, it will be handled following these procedures:

- ✓ The equipment is being scanned and photographed again, and placed on the processing belt.
- ✓ Every unit is discarded from eventual stickers, barcodes or other customer signs, opened and cleaned with compressed air and all electronic components are thoroughly tested.
- ✓ Unless you specifically tell us not to, we will keep your IT equipment in our storage space for a period of two weeks, to prevent accidental erasure of data that was not backed up.
- ✓ Once passed the physical control, each unit is being connected to our Blancco Eraser and Asset Management Unit.
- ✓ The Blancco Eraser software erases all data storage components (HDD, SSD), including DCO, HPA, remapped sectors, etc..
- ✓ The Blancco Asset Management software creates a detailed report of all hardware components, and writes it to our asset database...

3

RECONDITIONING AND/OR RECYCLING

Depending on its features, your equipment will be refurbished, recycled or destroyed.

- ✓ The most performant units will be sold through our own second hand retail stores, or via affiliated stores and websites.
- ✓ Less performant units will first be upgraded and then sold through our retail network.
- ✓ Functional units with too little residual value will be donated to respected European charity organisations. They have to return these units to GreenPC whenever they are broken or become obsolete, so we can guarantee a zero landfill policy.
- ✓ Non functional units are disassembled, after which most components will be reused as spare parts for repairs.
- ✓ Broken or obsolete electronic parts are being triaged and then sold to recycling factories with a zero landfill policy.
- ✓ We track all equipment that we sell, donate or recycle, allowing you to verify how you improve the lives of people around the world and preserve the environment.

Besides paying you serious money for your redundant IT equipment, GreenPC also wipes all data safely, certified, guaranteed and for free !

We guarantee that all data is wiped to the highest of standards and in accordance with the following European laws:

- ▶ France: The Directive 95/46/EC of the Act on data processing, data files and individual liberties.
- ▶ Luxembourg: Law of 2 August 2002 on the Protection of Persons with regard to the Processing of Personal Data.
- ▶ Belgium: Law of December 8, 1992 on Privacy Protection in relation to the Processing of Personal Data.
- ▶ Germany: Federal Data Protection Act (Bundesdatenschutzgesetz - BDSG) 2001.
- ▶ Netherlands: Personal Data Protection Act 2000 (Wet Bescherming Persoonsgegevens)

GreenPC guarantees the total removal of all data and all identification markings including electronic “tattoos”, locked/hidden areas (DCO, HPA) and remapped sectors, following international data wiping standards as DoD 5220.22-M, HMG INFOSEC Erasure Standards and OPNAVINST 5239.1A.

If for any reason the Hard Drive can not be accessed or data is proving difficult to wipe the hard drive is then removed and physically destroyed.

services

COMPUTER REPLACEMENT SERVICE

When the GreenPC team is collecting the PC's from your users desks, they can also install your newly purchase computers, as such relieving your IT staffs workload while ensuring a smooth and quick replacement without interrupting your business activities. The costs will be subtracted from your credit.

5

ONSITE DATA ERASING

The data erasing and asset management process can also be performed at your office, so that there is zero risk of data loss and a complete control over which equipment, and in which state it is leaving your company. The extra costs for this service will be subtracted from your credit.

STAFF COMPUTER SALES

Once you got paid by GreenPC for your obsolete IT equipment, why not organising a Computer Sales for your employees?

A lot of companies have done this in the past, but often gave up due to organisational issues and financial cost.

If GreenPC organises such a employee computer sales though, your costs are limited to a minor fee (6 to 10 €) per sold computer, and we will take care of the website for your employees to order, order tracking, payment, distribution and support issues. We setup a 3 month helpline and we even give a 6 month warranty with free replacement.

Of course this can all happen under your company name, which will highly enhance the internal company image.

services

GREENCLEAN CLEANING SERVICE

Using personal computers exposes us to an alarming amount of germs. The average keyboard contains more than 500 microbes per square cm, while the average toilet seat has only 8.

Inadvertently, infectious diseases get passed from person to person. The same is true for mice, monitors, desktop computers, etc.

GreenPC will “detail clean” – not just that cursory wipe – to transform your dingy equipment to look like new. Of course we only use sustainable cleaning products. We also leave on every desk several special cleaning tissues, so that your employees can maintain their keyboard and mouse themselves.

Or you could go for our Refurbishment service (>), in which case we will replace the keyboard and mouse with a cleaned one of the same brand, and clean the inside of your computers too.

COMPUTER REFURBISHMENT

In stead of replacing your computers every 3 years, you might consider having your computer park refurbished by GreenPC. We apply exactly the same procedures as for our recycling service, but in stead of selling your aged computers, we upgrade them to the highest possible standard.

Typically we will add memory, place a bigger and faster hard disk and even might upgrade the graphics card. On top of that we also replace the keyboard and mouse with a cleaned one of the same brand.

We can even do it onsite, so that you can limit offline time to a minimum. Of course we also place your data back on the new computer.

As there are many options to choose from, which can't all be covered in this brochure, please don't hesitate to contact us for a detailed quotation.

In order to provide total data security, we can remove all data storage from your computers and store it in a secured box, which will be shipped by a security firm to our processing factory, and ones wiped with Blancco, destroyed in our shredding machine. The costs will be subtracted from your credit.

total data security
